EXECUTIVE SUMMARY	1
--------------------------------	----------

PM _{2.5} MASS AND COMPOSITION RESPONSES TO CHANGING EMISSIONS	1
LOCAL, REGIONAL, AND CONTINENTAL MANAGEMENT OF PM _{2.5}	2
PREDICTIVE CAPABILITIES	2
COPOLLUTANT INTERACTIONS	3
NEW INSIGHTS FROM IMPROVED MEASUREMENTS AND MONITORING	3
LINKAGES BETWEEN THE HEALTH AND ATMOSPHERIC SCIENCE COMMUNITIES	3
TRACKING PROGRESS AND SUCCESS OF AIR-QUALITY MANAGEMENT	4
SCIENTIFIC UNCERTAINTIES AND LOOKING FORWARD	4

PARTICULATE MATTER SCIENCE FOR POLICY MAKERS: SYNTHESIS	7
--	----------

THE INFORMATION FRAMEWORK	7
AIR-QUALITY MANAGEMENT: A POLICY OVERVIEW	9
THE NATURE OF PM: A BRIEF OVERVIEW	9
PM ISSUES AND POLICY QUESTIONS	12

CONTENTS

Policy Question #1 - Is there a significant PM problem and how confident are we?	12
Key science findings	14
<i>Spatial and temporal characterization</i>	14
<i>Measurements</i>	15
<i>Health effects</i>	17
<i>Chemical deposition</i>	18
<i>Visibility and Climate</i>	18
New science to improve implementation approaches	19
Policy Question #2 - Where there is a PM problem, what is its composition and what factors contribute to elevated concentrations?	19
Key science findings	19
<i>Composition and the factor of seasonality</i>	19
<i>Emissions and atmospheric processes as contributing factors</i>	21
<i>Regional contributions</i>	21
<i>PM₁₀</i>	24
New science to improve implementation approaches	24
Policy Question #3 - What broad, pollutant-based, approaches might be taken to fix the problem?	24
Key science findings	24
<i>Coincident reduction of precursors</i>	24
<i>Reduction of carbonaceous PM</i>	25
<i>Reduction of nitrates</i>	25
<i>Differing regional strategies</i>	25
<i>The SO₄⁼-NO₃⁻-NH₄⁺ equilibrium</i>	26
<i>Area-specific insights</i>	27
<i>Regional reductions</i>	28
<i>PM₁₀</i>	29
New science to improve implementation approaches	29
Policy Question #4 - What source-specific options are there for fixing the problem given the broad control approaches above?	29
Key science findings	30
<i>Source-attribution approaches</i>	30
<i>Source-based modeling: Chemical-Transport Models</i>	30
<i>Receptor modeling</i>	32
<i>Emission inventories and source insights</i>	33
<i>Sources of PM</i>	34
New science to improve implementation approaches	35
Policy Question #5 - What is the relationship between PM, its components, and other air-pollution problems on which the atmospheric-science community is working?	36
Key science findings	36
<i>Visibility (regional haze)</i>	36
<i>Ozone</i>	38
<i>Chemical deposition (from PQ #1)</i>	39
<i>Climate change (from PQ#1)</i>	39
New science to improve implementation approaches	39

PARTICULATE MATTER SCIENCE FOR POLICY MAKERS

Policy Question #6 - How can progress be measured? How can we determine the effectiveness of our actions in bringing about emission reductions and air-quality improvements, with their corresponding exposure reductions and health improvements?	39
Key science findings	40
<i>Tracking emission changes</i>	40
<i>Tracking trends in ambient air-quality</i>	40
<i>Tracking changes in visibility</i>	43
<i>Tracking changes in exposure and health</i>	44
New science to improve implementation approaches	44
Policy Question #7 - When and how should implementation programs be reassessed and updated to adjust for any weaknesses, and to take advantage of advances in science and technology?	44
Key science findings	44
New science to improve implementation approaches	46
Policy Question #8 - What further atmospheric-sciences information will be needed in the periodic reviews of national standards?	46
Key science findings	46
<i>PM measurement considerations</i>	47
<i>Exposure-science considerations</i>	47
<i>Health-science considerations</i>	48
<i>Air-quality and exposure-modeling considerations</i>	48
New science to improve implementation approaches	49
BENEFITS TO THE POLICY COMMUNITY OF NEW SCIENCE	50
REFERENCES	52

CHAPTER 1 PERSPECTIVE FOR MANAGING PM 53

1.1 THE NATURE OF AMBIENT PARTICLES	54
1.2 SCALE, SOURCES, AND MANAGEMENT OF THE PROBLEM	56
1.3 HEALTH IMPACTS	59
1.4 VISIBILITY IMPACTS	61
1.5 FEDERAL AMBIENT PM STANDARDS AND POLICY CONTEXTS	62
1.5.1 Canada	62
1.5.2 United States	63
1.5.3 Mexico	64
1.5.4 Implementation of Scientific Information into Decision Making	65
1.6 THE STRUCTURE OF THE ASSESSMENT	66
1.7 REFERENCES	68

CONTENTS

CHAPTER 2 HEALTH CONTEXT FOR MANAGEMENT OF PARTICULATE MATTER..... 69

2.1 OVERVIEW	69
2.2 HISTORICAL PERSPECTIVE	69
2.3 EXPOSURE ASSESSMENT	72
2.4 SOURCES OF INFORMATION ON HEALTH RESPONSES TO AIR POLLUTION	76
2.4.1 Epidemiological Approaches	77
2.4.2 Controlled-Exposure Studies with Human Subjects	81
2.4.3 Laboratory Animal Studies	82
2.4.4 Tissue and Cell Studies	82
2.5 EPIDEMIOLOGICAL FINDINGS	83
2.5.1 Acute Exposure	83
2.5.2 Chronic Exposures	86
2.6 INTERVENTION STUDIES	90
2.7 TOXICOLOGICAL EVIDENCE	92
2.8 POLICY-RELEVANT FINDINGS AND FUTURE OPPORTUNITIES	94
2.9 REFERENCES	95

CHAPTER 3 ATMOSPHERIC AEROSOL PROCESSES 103

3.1 THE LIFE OF AN ATMOSPHERIC PARTICLE	103
3.2 A PARTICLE IS BORN: NUCLEATION	107
3.3 HOW LONG DOES IT TAKE FOR A PARTICLE TO COLLIDE WITH ANOTHER?	108
3.4 PARTICLES AND WATER	108
3.5 SECONDARY PM FORMATION	109
3.5.1 Sulfate	110
3.5.2 Nitrate	111
3.5.3 Secondary Organic Aerosol (SOA) Formation	111
3.5.4 Interactions of Primary and Secondary PM Components	112
3.6 FROM PRECURSOR EMISSIONS TO AEROSOL COMPONENT CONCENTRATION	113
3.6.1 Linearity	114
3.6.2 An Application to Southern California	115
3.6.3 Effectiveness of SO ₂ Emission Reductions	115
3.6.4 VOC Emission Reductions and SOA	117
3.6.5 Limiting Reactants	117
3.7 REMOVAL AND LONG-RANGE TRANSPORT OF PM.....	118
3.8 PM AND OTHER POLLUTANTS	120
3.9 POLICY IMPLICATIONS	120
3.10 REFERENCES	123

CHAPTER 4 EMISSION CHARACTERIZATION 127

4.1 TYPES OF EMISSION INVENTORIES AND THEIR USES	129
4.2 THE NATURE AND CHARACTERISTICS OF EMISSION INVENTORIES	130
4.2.1 Characterization by Source Category	132
4.2.2 Geographical Distribution of Emissions	137
4.2.3 Temporal Variations, Trends and Forecasts in Emissions	138
4.2.3.1 Temporal Variations	138
4.2.3.2 Trends and Projections	140
4.3 ESTIMATING UNCERTAINTY IN EMISSION INVENTORIES	143
4.4 IMPROVING ESTIMATION METHODS	146
4.4.1 Methodological Improvements	148
4.4.2 The Source/Ambient-Air Interface	149
4.5 HOW WELL DO THE EMISSION INVENTORIES ADDRESS APPLICATION NEEDS?	151
4.6 SUMMARY	153
4.7 POLICY IMPLICATIONS	155
4.8 REFERENCES	156

CHAPTER 5 PARTICLE AND GAS MEASUREMENTS 159

5.1 CURRENTLY AVAILABLE TECHNOLOGY AND INSTRUMENT CAPABILITIES	161
5.1.1 Size-Selective Inlets	161
5.1.2 Integrated Denuder and Gravimetric Filter-Based Systems (substrate- and absorbent-based measurements) for Mass and Composition Sampling	163
5.1.3 Continuous and Semi-continuous Real-time Measurements	166
5.1.4 Personal Exposure Monitors	169
5.1.5 Single-Particle Measurement Capabilities	170
5.1.6 Optical Properties of Aerosols and Long-Path Optical Measurements	170
5.1.7 Chemical Analysis of Cloud and Fog Chemical Composition	173
5.1.8 Gas-Phase PM Precursors, Ozone, Ozone Precursors, and Oxidants	173
5.1.9 Meteorological Measurements	173
5.2 MEASUREMENT UNCERTAINTY AND VALIDATION	174
5.2.1 Estimation of Particle Measurement Uncertainty	174
5.2.2 Mass and Size Distribution	175
5.2.3 Aerosol Chemical Composition	176
5.2.4 Uncertainties in Routine Gas-phase Measurements Used for Network Monitoring	177
5.3 MEASUREMENT STRATEGIES AND NETWORK ISSUES	178
5.3.1 Deployment of Measurement Technology	178
5.3.2 Future Requirements for Measurement Strategies	182
5.4 SUMMARY	183

CONTENTS

5.5 POLICY IMPLICATIONS	186
5.6 REFERENCES	187

CHAPTER 6 SPATIAL AND TEMPORAL CHARACTERIZATION OF PARTICULATE MATTER 191

6.1 INTRODUCTION	191
6.1.1 General Features Affecting Particulate Levels in North America	191
6.1.2 Spatial and Time Scales of Interest	192
6.1.3 Monitoring Capabilities	193
6.2 CONTINENTAL AND REGIONAL VARIATIONS OF PM CONCENTRATIONS	193
6.2.1 Spatial Variations of PM ₁₀ Mass: Where and When are PM ₁₀ Concentrations Highest?	195
6.2.2 Spatial Patterns of PM _{2.5} Mass	198
6.2.3 Seasonal Variations of PM _{2.5} Mass	201
6.2.4 The Composition of PM _{2.5} and Its Geographical Variation	205
6.3 REGIONAL AND URBAN CONTRIBUTIONS TO PM	209
6.3.1 Comparisons Between Rural and Urban Sites	209
6.3.2 Evidence for Local PM Sources: Temporal Variations	209
6.3.3 PM Mass Concentrations at Remote Locations	210
6.3.4 Regional Transport	214
6.4 THE INFLUENCE OF INTERCONTINENTAL AEROSOL TRANSPORT ON PM MASS CONCENTRATIONS IN NORTH AMERICA	215
6.5 TRENDS AND THEIR IMPLICATIONS	217
6.6 COVARIATION OF PM WITH OZONE	223
6.7 SUMMARY	224
6.8 POLICY IMPLICATIONS	229
6.9 REFERENCES	231

CHAPTER 7 RECEPTOR METHODS 235

7.1 INTRODUCTION AND OVERVIEW	235
7.2 RECEPTOR MODEL TYPES	239
7.2.1 Chemical Mass Balance	241
7.2.2 Enrichment Factors	245
7.2.3 Multiple Linear Regression on Marker Species	245
7.2.4 Temporal and Spatial Correlation Eigenvectors	246
7.2.5 Time Series	246
7.2.6 Neural Networks	247
7.2.7 Aerosol Evolution and Equilibrium	247
7.3 RECEPTOR-MODEL INPUT MEASUREMENTS	247
7.3.1 Particle Size	248

7.3.2 Chemical Composition	248
7.3.2.1 Soil, Dust, and Industrial Markers	249
7.3.2.2 Combustion Markers	249
7.3.2.3 Secondary Sulfate and Nitrate	249
7.3.2.4 Carbonaceous Particles	252
7.3.2.5 Secondary Organic Aerosol	255
7.3.2.6 Other Chemical Markers	255
7.3.3 Temporal and Spatial Variability	256
7.3.4 Combining Size, Composition, Space, and Time	256
7.4 RECEPTOR MODELS AND DECISION-MAKING	257
7.4.1 Sulfur Reductions in Canadian Gasoline	257
7.4.2 PM _{2.5} and Urban Haze in Denver, CO	260
7.4.3 Haze in the Grand Canyon	263
7.4.4 Understanding the Sources of PM ₁₀ and PM _{2.5} in Mexico City	265
7.5 DEVELOPING PM MANAGEMENT STRATEGIES	266
7.5.1 Manageable and Unmanageable Source Contributions	266
7.5.2 Main Contributors to Manageable PM	267
7.6 SUMMARY	269
7.7 POLICY IMPLICATIONS	270
7.8 REFERENCES	271

CHAPTER 8 CHEMICAL-TRANSPORT MODELS 283

8.1 INTRODUCTION	283
8.2 CURRENT STATUS OF PM CHEMICAL-TRANSPORT MODELS	287
8.2.1 Emissions	287
8.2.2 Meteorology	288
8.2.3 Transport and Diffusion Processes	290
8.2.4 Chemical Transformations	290
8.2.5 Representation of PM	291
8.2.6 Deposition Processes	292
8.2.7 Computational Aspects	293
8.3 APPLICATIONS OF CHEMICAL-TRANSPORT MODELS TO THE SIMULATION OF EPISODIC AND LONG-TERM PM CONCENTRATIONS	294
8.3.1 Episodic Simulations	294
8.3.2 Long-Term Simulations	294
8.4 WHAT QUESTIONS CAN CHEMICAL-TRANSPORT MODELS ADDRESS AND HOW WELL?	295
8.4.1 Can the Contributions of Various Precursors and Source Types to PM Be Quantified?	295
8.4.2 Can the Relative Contributions of Long-Range Transport and Local Emissions Be Quantified?	296
8.4.3 Can the Relative Magnitude of Seasonal Contributions to PM Concentrations	

CONTENTS

Be Represented?	297
8.4.4 Can the Response of PM Levels to Changes in Emissions and Upwind Concentrations Be Predicted?	297
8.4.5 Can the Relationships Between PM and Other Air-Pollution Problems Be Quantified?	298
8.4.6 Can Other PM Properties that are Potentially Relevant to Health Effects Be Calculated?	298
8.4.7 Can PM Episodes Be Forecast in Real Time?	299
8.5 EVALUATION PROCESS FOR CHEMICAL-TRANSPORT MODELS	299
8.5.1 Model Simulations versus Ambient Measurements	299
8.5.2 Overview of the Performance-Evaluation Process	300
8.5.3 Data Needs for CTM Performance Evaluation	301
8.5.4 Corroboration of CTM Results with Indicator-Species Methods	301
8.6 CURRENT STATUS OF CTM PERFORMANCE AND INTERCOMPARISONS	302
8.7 USE OF CTMS TO COMPLEMENT MONITORING NETWORKS	306
8.8 USE OF CTMS TO SUPPORT ESTIMATIONS OF EXPOSURE	306
8.9 POLICY-RELEVANT RESULTS FROM CTM APPLICATIONS	308
8.9.1 PM CTMs	308
8.9.2 Acid-Deposition CTMs	310
8.9.3 Photochemical CTMs	313
8.10 CRITICAL UNCERTAINTIES	313
8.11 SUMMARY	316
8.12 POLICY IMPLICATIONS	318
8.13 REFERENCES	319

CHAPTER 9 VISIBILITY AND RADIATIVE BALANCE EFFECTS 325

9.1 HOW IS VISIBILITY LINKED TO PM?	325
9.1.1 How Is Visibility Distributed and How Has It Varied over the Years?	327
9.1.2 Factors Affecting the Relationship between PM and Visibility	329
9.1.3 Empirical Relationships between PM and Visibility	330
9.1.4 What are Some Special Issues with Visibility?	333
9.2 ROLES AND USES OF PM AND OPTICAL MEASUREMENTS IN VISIBILITY ASSESSMENT AND MANAGEMENT	334
9.2.1 Long-Term Monitoring Programs	334
9.2.2 Short-Term Measurement Programs	336
9.2.3 An Example of a Scenic Visibility Setting – The Colorado Plateau	336
9.2.4 Can One Use PM Studies for Visibility?	338
9.3 HOW ARE MODELS USED IN VISIBILITY MANAGEMENT?	338
9.3.1 What Specific Features are Required when Modeling Visibility?	339
9.3.2 Are Current Models Able to Simulate Visibility Conditions?	339
9.3.3 What Would Improve the Capacity to Model Visibility?	341
9.4 ATMOSPHERIC PARTICLES AFFECT THE GLOBAL RADIATION	

BALANCE	342
9.5 VISIBILITY MANAGEMENT ISSUES AND APPROACHES	345
9.5.1 What Is Being Done to Manage Visibility?	345
9.5.2 Alignment of Visibility and PM Control Programs	346
9.5.3 Regional Planning Organizations	347
9.5.4 Point-Source Control Programs	347
9.5.5 International Programs	347
9.6 SUMMARY AND CONCLUSIONS	348
9.7 POLICY IMPLICATIONS	350
9.8 REFERENCES	351

CHAPTER 10 CONCEPTUAL MODELS OF PM FOR NORTH AMERICAN REGIONS..... 355

10.1 OVERVIEW	355
10.2 SUMMARY	357
10.3 CONCEPTUAL MODEL OF PM OVER THE SAN JOAQUIN VALLEY OF CALIFORNIA	359
10.3.1 Annual and Seasonal Levels of PM _{2.5} and PM ₁₀ in Relation to Mass-Based Standards	359
10.3.2 Compositional Analysis of PM	364
10.3.3 Meteorological Influences	364
10.3.4 Atmospheric Processes Contributing to PM	365
10.3.5 Sources and Source Regions Contributing Principal Chemicals of Concern	366
10.3.6 Implications for Policy Makers	367
10.4 CONCEPTUAL MODEL OF PM OVER LOS ANGELES, CALIFORNIA	367
10.4.1 Annual and Seasonal Levels of PM _{2.5} and PM ₁₀ in Relation to Mass-Based Standards	367
10.4.2 Compositional Analysis of PM	368
10.4.3 Meteorological Influences	370
10.4.4 Atmospheric Processes Contributing to PM	370
10.4.5 Sources and Source Regions Contributing Principal Chemicals of Concern	371
10.4.6 Implications for Policy Makers	373
10.5 CONCEPTUAL MODEL OF PM OVER MEXICO CITY	373
10.5.1 Annual and Seasonal Levels of PM _{2.5} and PM ₁₀ in Relation to Mass-Based Standards	373
10.5.2 Compositional Analysis of PM	374
10.5.3 Meteorological Influences on PM	376
10.5.4 Atmospheric Processes Contributing to PM	377
10.5.5 Sources and Source Regions Contributing Principal Chemicals of Concern	377
10.5.6 Implications for Policy Makers	378
10.6 CONCEPTUAL MODEL OF PM OVER THE SOUTHEASTERN UNITED STATES	379
10.6.1 Annual and Seasonal Levels of PM _{2.5} and PM ₁₀ in Relation to Mass-Based Standards	379
10.6.2 Compositional Analysis of PM	380
10.6.3 Meteorological Influences on PM	382

CONTENTS

10.6.4 Atmospheric Processes Contributing to PM	383
10.6.5 Sources and Source Regions	383
10.6.6 Implications for Policy Makers	383
10.7 CONCEPTUAL MODEL OF PM OVER THE NORTHEASTERN UNITED STATES	385
10.7.1 Annual and Seasonal Levels of $PM_{2.5}$ and PM_{10} in Relation to Mass-based Standards	385
10.7.1.1 Annual Mean Concentrations of $PM_{2.5}$	385
10.7.1.2 24-hr-Mean Concentration of $PM_{2.5}$	385
10.7.1.3 Annual and Daily PM_{10}	386
10.7.1.4 Seasonal-Mean Concentrations of $PM_{2.5}$	386
10.7.2 Compositional Analysis of PM	386
10.7.2.1 Seasonal Mean $PM_{2.5}$ Composition	388
10.7.3 Meteorological Influences on PM	389
10.7.4 Atmospheric Processes Contributing to PM	389
10.7.5 Sources and Source Regions Contributing Principal Chemicals of Concern	390
10.7.6 Implications for Policy Makers	390
10.8 CONCEPTUAL MODEL OF PM OVER THE WINDSOR-QUEBEC CITY CORRIDOR	391
10.8.1 Annual and Seasonal Levels of $PM_{2.5}$ and PM_{10} in Relation to Mass-Based Standards	391
10.8.2 Compositional Analysis of PM	392
10.8.3 Meteorological Influences on PM	394
10.8.4 Atmospheric Processes Contributing to PM	394
10.8.5 Sources and Source Regions Contributing Principal Chemicals of Concern	395
10.8.6 Implications for Policy Makers	395
10.9 CONCEPTUAL MODEL OF PM OVER THE U.S. UPPER MIDWEST – GREAT LAKES AREA	396
10.9.1 Annual and Seasonal Levels of $PM_{2.5}$ and PM_{10} in Relation to Mass-Based Standards	396
10.9.2 Compositional Analysis of PM	396
10.9.3 Meteorological Influences	396
10.9.4 Atmospheric Processes Contributing to PM	396
10.9.5 Sources and Source Regions Contributing Principal Chemicals of Concern	397
10.9.6 Implications for Policy Makers	398
10.10 CONCEPTUAL MODEL OF PM OVER THE CANADIAN PRAIRIE AND U.S. CENTRAL PLAINS	398
10.10.1 Annual and Seasonal Levels of $PM_{2.5}$ and PM_{10} in Relation to Mass-Based Standards	398
10.10.2 Compositional Analysis of PM	399
10.10.3 Meteorological Influences on PM	399
10.10.4 Atmospheric Processes Contributing to PM	401
10.10.5 Sources and Source Regions Contributing Principal Chemicals of Concern	401
10.10.6 Implications for Policy Makers	401
10.11 CONCEPTUAL DESCRIPTION OF PM OVER THE LOWER FRASER VALLEY AIRSHED	402
10.11.1 Annual and Seasonal Levels of $PM_{2.5}$ and PM_{10} in Relation to Mass-Based Standards	402
10.11.2 Compositional Analysis of PM	404
10.11.3 Meteorological Influences on PM	404

10.11.4 Atmospheric Processes Contributing to PM.....	407
10.11.5 Sources and Source Regions Contributing Principal Chemicals of Concern.....	407
10.11.6 Implications for Policy Makers	408
10.12 REFERENCES	409

CHAPTER 11 RECOMMENDED RESEARCH TO INFORM PUBLIC POLICY 415

11.1 RECOMMENDATIONS	416
11.2 FUTURE NARSTO PM ASSESSMENTS	431
11.3 REFERENCES	432

GLOSSARY 433

ACRONYMS AND ABBREVIATIONS	433
DEFINITIONS	435

APPENDIX A. EMISSION CALCULATIONS AND INVENTORY LISTINGS 439

A.1 HOW ARE EMISSIONS CALCULATED?	439
A1.1 Emission and Emission Reduction Factors	439
A1.2 Activity Patterns	440
A1.3 Spatial Allocation	442
A1.4 Processing for Model Applications.	443
A1.5 Limitations and Uncertainties	443
